

CERTIFICATE No ...

Declaration on the inks MOSH and MOAH contents Certificate from the ink manufacturer for printed papers

In the inks supplied by the company:

Name:
Address:
Postcode: City:
Country:
Identification number:

the total¹ content is below 1% of MOAH² and 1.5% of MOSH² C20-C30³ applied to the ink weight, the threshold for the Citeo penalty on printing inks for graphic papers.

Products concerned:

Wording:
Reference:

¹ MOSH and MOAH content must be respected for all ingredients derived from petroleum and used in inks.

² Mineral oils are complex hydrocarbon substances (composed of hydrogen and carbon molecules) produced by the refining of crude oils. They contain MOSH (Mineral Oil Saturated Hydrocarbons) and MOAH (Mineral Oil Aromatic Hydrocarbons). MOSH are composed of linear, branched and / or cyclic carbon chains, and MOAH of aromatic compounds.

³ C20-C30 refers to compounds whose carbon chains are between 20 and 30 carbon atoms.

Starting from January 1, 2025, this certificate will no longer be valid to justify the compliance of your prints with French law, specifically Article 112 of the AGECE law. Indeed, in accordance with the Decree of April 13, 2022, which specifies the substances contained in mineral oils whose use is prohibited on packaging and for printed papers intended for the public, the legal threshold for MOSH and MOAH in ink is set at 0.1%.
